Letter of recommendation for doc. Mgr. Jaromír Fiurášek, Ph.D.

I am very pleased to have the opportunity to recommend Jaromír Fiurášek for the academic title of Full Professor.

Jaromír Fiurášek and myself have been collaborating since 2006, which is documented by 16 joint publications in peer-reviewed Journals, including two publications in Nature Physics and Nature Communication, respectively. The scientific collaboration with Jaromír Fiurášek has been exceptionally fruitful and the high level of scientific results was only possible by combining my own expertise in experimental quantum optics with Jaromír Fiurášek's expertise in theoretical quantum optics.

Jaromír Fiurášek's expertise in theoretical quantum optics and quantum information is highly respected and well known within the international community. The quality of his research as well as his publication record of 136 publications, which corresponds to about ten per year since his Ph.D., is well above typical measures of those of Full Professors of his age.

I am convinced that Jaromír Fiurášek combines all excellence required for a Full Professor and I strongly recommend him for being awarded this title.

Yours sincerely,

Roman Schnabel
