Letter of Recommendation for Doc. Mgr. Miroslav Ovecka, CSc.

I am pleased to strongly recommend Doc. Mgr. Miroslav Ovecka, CSc. for the academic title Full Professor.

I know Miroslav Ovecka from already 1980' and we started collaboration some 20 years ago. Miroslav Ovecka's excellent expertise is in plant cell biology, especially in the modern microscopic techniques. Last few years he became an expert in advanced light-sheet microscopy imaging of living plants during their development. He is an internationally recognized scientist in the field of plant tip growth. Moreover, he is very active in teaching (both lectures and practical courses) within study subject Biotechnology and Genetic Engineering at CR Haná and in mentoring pre-graduate and post-graduate students.

I am convinced that the Miroslav Ovecka's excellence fulfils all the criteria which are required for a Full Professor title. I strongly recommend him as an excellent candidate for the academic title Full Professor.

Sincerely yours,
František Baluška
